

cfiber 100W Plus

Genuine Carbon Fiber
High Power Battery

USER MANUAL

Product Brief

CFIBER 100W PLUS is a VV/VW battery, its voltage ranges from 3.3V to 4.2V, and wattage ranges from 20.0 to 100.0W. The wattage is changing with the resistance of atomizer. CFIBER 100W adopts 3000mAh high power built-in battery cell, output current is 40A.

CFIBER 100W PLUS is an electronic cigarette battery perfect for 0.1 to 0.6Ω SUB-OHM atomizers.

Specifications

Size: 107*24mm

Color: Black, Red, Blue, Green, Purple, Silver, Abalone Seashell.

Material: Carbon Fiber or Abalone Seashell & Stainless Steel

Battery Capacity: 3000mAh

Voltage: 3.3-4.2V

Power: 20.0-100.0W

Resistance: 0.1-0.6OHM

Precautions

1. This product is simply an alternative to tobacco smoking products and should only be used by current smokers. Do not use this product if you are under the legal age of smoking. Do not use this product if you have or if you are at risk of having any respiratory conditions, heart disease, high blood pressure or diabetes. Do not use it if you are pregnant or nursing.
2. This unit may include small parts, please keep it away from children and pets.
3. In order to keep it in the best state, please charge the CFIBER 100W PLUS battery when the OLED light is flashing while you press it.
4. Don't place CFIBER 100W PLUS in too hot or too cold environment, keep the battery power off if there are some bans or potential dangers.
5. CFIBER 100W PLUS is not waterproof, please keep it dry. To avoid any damage or injury, please don't attempt to repair it by yourself if it drops into water or has any other malfunctions.

Micro USB Charging Jack

CFIBER 100W PLUS has a micro USB charging jack, please charge it with the USB charger in the kit. Charging voltage is 3.3-4.2V, maximum charging current is 1.0A.

How to Use

Press the button for vaping, the OLED light will be on, and the battery will support power to heat the atomizer's coil then. It will turn into sleep mode when you release the button. CFIBER 100W PLUS will stop working and OLED light will be off after blinking 3 times if you are taking one puff over 10S. Press the button on the battery 5 times to turn it on, the OLED in the button blinks 3 times.

If you don't use the CFIBER 100W PLUS in a long period of time, please press the button 5 times to turn it off, then lay it flat on the table and keep it away from children and pets.

Recommendation for Use

As you know, CFIBER 100W PLUS is a variable voltage and wattage battery, so use it with a right resistance atomizer is very important. With proper resistance atomizer, it can make bigger vapor and avoid burning smell. CFIBER 100W PLUS is perfect for SUB-OHM atomizers, supportable resistance ranges best from 0.1 to 0.6 OHM. The wattage is changing with the different resistance of atomizer. Please do not make the atomizer work under high power that it can not bear. When you realize the atomizer makes burning smell, please stop vaping and turn down the power immediately.

Temperature Control System

With such high power, the battery and atomizer will produce immense heat. If the temperature is too high, it will be dangerous. It may result in breakdown, or even an explosion. There is a temperature control system in the battery to avoid this danger. If the temperature reaches a certain value (about 78 degrees centigrade), the system will turn off the battery automatically, and it won't work continually until temperature returns to normal value.

After-sales Service

The customer service at SMOKJOY is second to none. It is our mission to continuously do everything we can to make sure your electronic vaping experience to be the best it can possibly be. If you have any question, you can reach us through the following contact information.
