6. If you have any questions, please contact us via www.teslacigs.com.

ERGONOMIC DESIGN

SUBMERGED ATOMIZER DESIGN

Protections:
1. **Over Puffing Protection:** Device will deactivate after prolonged continuous puffs of more than 10 seconds. Screen will flash HL(Long Smoking)!
2. **Low-Voltage Protection:** When the voltage/power is too low, the screen will display 'Low Battery'. Please recharge the device.
3. **No Atomizer Protection:** If no atomizer is attached to the device, the screen will display 'No Atomizer'.
4. **Atomizer Short Protection:** Device has internal controls to protect against atomizer shorts.
With regular coil, resistance below 0.1ohm.
With Ti/Ni/SS316 coil, resistance below 0.05ohm.
5. **Automatic Power Adjust Protection:** Using this device under high wattage situations when the battery is at low voltage/power conditions, the battery sign will flash continuously and will auto adjust the output wattage power to be used in safe normal modes.

9). **Charging:** Use the Tesla USB cable to recharge the device. While the device is recharging, the big battery symbol will fluctuate right and left on the screen. Once the device is fully charged, the battery symbol will be static.

RECOMMENDED ATOMIZER

Stealth 40W fits atomizers up to 23.5mm diameter, it matches perfectly with the Shadow 2ML tank. Positively an amazing vape experience.

6). **Switch Between Mode Types:** To switch from Wattage mode to Temp mode, press the fire button 5 times consecutively to lock the device. In lock mode, press the up and down buttons to select desired temperature. Temperature range is between 200 Degrees F to 600 Degrees F, or 100 Degrees C to 300 Degrees C. To disable the Temp mode feature, adjust temperature to 600 Degrees F and press the Up button once. Screen will display "OFF".
7). **Adjust Power Option:** When device is powered on, press the up/down button to adjust wattage accordingly. Wattage will move in .5 increments. Press and hold up or down button to adjust wattage rapidly.
8). **Bypass Mode:** Select wattage to 40W, press the up button once more to switch device to Bypass Mode (Mechanical Mode).

How to use?
1). **Power On:** Press the fire button 5 times continuously to turn on the device.
2). **Power Off:** Press the fire button 5 times continuously to turn off the device.
3). **Vaping:** Long press the fire button to get a puff, loosen the button to stop puff.
4). **Power Lock/Unlock:** Hold down both fire button and down button to lock/unlock your device.
5). **Resistance Lock/Unlock:** Hold down both fire button and up button to lock/unlock the coil resistance. When the lock sign displayed, thus the resistance is locked. (Note: Such operation should be carried out at room temperature.)
6). **Select Ti/Ni/SS/Normal Mode:** Attach a temp control coil to the device and press the fire button. The screen will prompt "Temp Coil Select." Choose the appropriate coil type using the up/down buttons. For a new coil, press the up button. If you disconnect and reconnect the same atomizer coil, then select the down button. After the coil type is selected, press the fire button.
