- 4.2 Capacity choices:3ml(straight glass)/4ml(Bubble resin tube).
- 5.Manta tank mesh coil can work with manta tank/dominator tank/Nrg tank/TFV8 baby/big baby/TFV12 baby prince.

How to Change Coil:

- 1.Empty the tank's inside e-liquid then screw down the deck.
- 2.Screw down the used coil and screw up the new coil.
- 3.Wet the new coil with your e-liquid.
- 4.Screw up the tube with the deck.

How to Refill Tank:

Hold the tank in hand upside or screw down it with a mod. Then find the “Triangle Mark” on the top cap, push the top cap as the mark showed to find the filling hole. Later, fill the tank with proper amount e-liquid. After that, push back the top cap and make sure the top cap closed well.

How to VAPE:

Screw down the Cp tf rta with a mod well, make sure contact is OK. Then press the fire button as long as you inhale from the drip tip, then release the button.

Note:

- 1.Please drip a few drops of e-liquid into the coils and let the rta stand a few minutes to make sure the coils soak enough before the first use.
- 2.Please refill the rta in-time to avoid dry-burning.
- 3.Protect this device from direct sunlight, heat, moisture and mechanical impact.
- 4.The device must not be cleaned under running water! Use only a damp, lint-free cloth for external cleaning.

Verification:

Scratch off the cover of the security label on the box to get the anti-fake codes. Then fill the codes into the input box on the www.advken.com to verify. Finally, the results will come out later.
